

# Primary School Cashless Catering

## PROVEN CASHLESS CATERING TO BRING SPEED, EFFICIENCY AND CONTROL TO YOUR CATERING OPERATION.

Comprehensive options for paying money in, importing student details, processing cashless transactions and creating reports for finance, catering and parents.

Schools using LunchHound benefit from total financial control of their catering operation, greatly improved efficiency and automated tools for communication with parents.

## FOCUSSED ON PRIMARY

Collaboration between the LunchHound team and its customers has resulted in a system specifically matched to the needs of Primary School Cashless Catering. As new features are added the whole customer base is kept up to date and can stay ahead of new educational requirements.

## KEEPING IT SIMPLE

Easy to learn, clean design, fast support and 'out of the box' install; everything designed to make the LunchHound experience simple and uncomplicated. Operators can be quickly trained and rotas incorporating new or temporary staff can be used to allow for maximum flexibility.

▶ COST EFFECTIVE

▶ LESS WASTAGE

▶ PROVEN RELIABILITY

▶ EASY TO USE

LunchHound has been a godsend which would be difficult to live without. It would certainly be very difficult for us to keep such a tight rein on our catering finances and for the lunch service to go so smoothly.

**Kathryn Tunstall, Business Manager, Moulton School**

# The complete solution for Primary School Cashless Catering

Ask how LunchHound can help...

## Paying In

Cheques and cash are quickly entered manually and online payment makes topping up student accounts simple and convenient, with the added attraction of allowing parents to see what their child has eaten on a daily basis.

## Pre-Order System

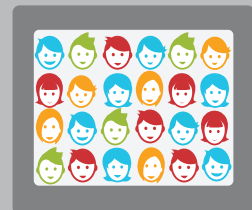

Student meal choices made during registration are fed to the kitchen to ensure that the exact number of meals are prepared, thereby reducing waste. Each student's meal choice is indicated at the till to speed up service.

## Student Information

Free School Meal entitlement, photographs, allergies and other student information is entered manually or imported automatically from the school's MIS and updated as details change or new students are added.

## Pre-Order Touchscreen

## Touchscreen Till Identify and Process

## Reporting

Every aspect of the catering operation can be analysed, at any time, from any number of administration PC's. A wide selection of reports are available to ensure total visibility, full control and overall audit accountability.

## Parental Information

Reports can be created and fed to parents via email, text or online payment system. The inclusion of next week's menu improves the level of parental engagement and encourages the take up of school meals.

## Free School Meals

Handled in a way that's transparent to the child and the till operator. Reports on uptake of free school meals clearly differentiate between Pupil Premium and Universal Infant Free School Meal entitlements.

## Did you know?

LunchHound can be paid for as a monthly service.

LunchHound has helped us to create an efficient and smooth running school lunch service with a much higher degree of visibility. Support is always readily on hand at the end of the telephone.
